OPTOMETRY'S MEETING HOME

The 128th Annual AOA Congress & 57th Annual AOSA Conference: Optometry's Meeting unites the profession's leaders to advance optometry and engage the associations' official business while also delivering an impactful conference experience that promotes continued practice success and job-readiness skills for every stage of attendees' career.

Over the course of four days, doctors of optometry, paraoptometrics / practice staff and optometry students can tap into an expansive, progressive CE and professional development program, suitable for the entire optometric practice; engage in impactful networking and leadership opportunities alongside colleagues and the profession's leaders from across the country; access the latest ophthalmic goods and services, business solutions and industry connections in the expansive Eye Care Square exhibit hall; enjoy a slate of local entertainment and reception opportunities; and see, firsthand, what it takes to become involved and effect lasting change in our profession by making the AOA a stronger, more effective advocate for the quality care that optometry provides patients.

Optometry's Meeting 2025 hosts the 5th World Congress of Optometry, in partnership with the World Council of Optometry, in Minneapolis, where our globally minded event will focus on advancing universal access to high-quality eye health and vision care, as well as an industry-leading conversation on technological advancements across the eye health care industry.
